

ABSTRACT

A pet storage box fixing structure configured to fix the pet storage box (10) in which a pet is stored, to a vehicle body (1) in a vehicle interior, wherein the pet storage box is placed on a seat cushion (2a), and a seat belt (3) of a seat belt device is passed through a belt insert hole (16) on an outer peripheral surface side of the pet storage box (10) and directly connected to the pet storage box (10) so that the connected seat belt is in a belt attached state. The pet storage box (10) comprises a storage box body (11) and a reinforcing belt (12). The pet storage box (10) is provided with the belt insert hole (16) which is formed by using a restrain belt part (12a) of the reinforcing belt (12). Stable belt parts (12b,12c) of the reinforcing belt (12) are hooked to columns (2c,2c') of rear and front seats (2,2').
